

Aluminum Injection Packer

The aluminum injection packer is used for injection of special chemicals into a building or other constructions for the purpose of sealing, waterproofing, penetration, impregnation, bonding and consolidation of the structure.

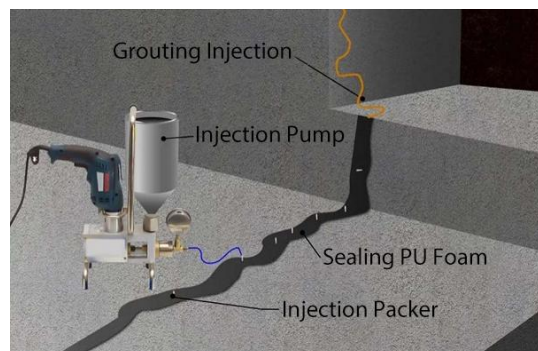

Data Sheet:

Description	Outer diameter of rubber seal (mm)	Length of packer (mm)	Inside diameter of packer (mm)	Inside diameter of nipple (mm)	Type of nipple	Maximum pressure (bar)	Min pressure of nipple open (bar)	Borehole for packer mounting (mm)
Injection packer	13	80 100 150	2 ~ 2.5	1.4 ~ 1.6	Ball head	150	15	14

Tips of PU injection:

- Drill the holes by 45 degree with concrete crack.
- Put the injection packer into the holes.
- Start the PU injection.
- Finish the works and polish.

Aluminum injection packer storage

The aluminum packer put in a cool and ventilated place, non toxic and not damaging to one's health.
